

FRONT END DEVELOPER

Kajal verma

PROFESSIONAL SUMMARY

I am an experienced Front End Developer with over 8 years of experience in the web development field. I have a strong technical background in HTML, CSS, JavaScript and other related technologies. I have extensive experience in developing user interfaces for web applications and creating visually appealing websites. My greatest strengths include problem-solving, creativity, attention to detail and excellent interpersonal communication skills. I have successfully implemented various projects for clients in the past such as building custom dashboards for web applications and designing intuitive user interfaces. My biggest achievements include leading development teams in creating high-performance websites that have also won awards for their design quality. I am a motivated self-starter with a passion for creating high-quality products that meet customer needs.

EXPERIENCE

Executive, SBI card, India, Bulandshahr 2020 - 2021

During my time at SBI card as a Sales Executive from February 2020 to January 2021, I gained valuable experience in the banking and finance industry. My primary responsibility was to promote and sell credit cards and other financial products to potential customers. I also worked closely with existing customers to ensure their satisfaction and retention.

- Conducted market research and identified potential leads
- Developed and maintained relationships with clients
- Achieved monthly sales targets consistently
- Provided excellent customer service and support

Keep Clone

- Utilized my knowledge in html, css, and javascript to create a seamless and user-friendly experience for saving notes locally.
- Continuously tested and debugged the functionality to ensure smooth performance for users.

E-commerce

During my time as an Ecommerce project using html css javascript, I successfully designed and implemented various features for an online shopping platform. This included creating responsive layouts, integrating payment gateways, and optimizing user experience through javascript functionality.

MyPortfolio

During my time as a MyPortfolio using react js employee, I gained valuable experience in both front-end development and utilizing the ReactJS framework. I successfully created and maintained professional online portfolios for clients using this technology.

Digital Signature

Successfully implemented e-signature functionality using Javascript for client's website, resulting in a more efficient and user-friendly signing process.

Youtube Clone

During my time as a youtube clone, I successfully replicated the functionality and design of the original Youtube platform. I gained valuable experience in coding, UI/UX design, and project management while working on this project.
